International Journal of Production Research

Volume 34, 1996—CONTENTS

No. 1 January 1996

Life cycle support of manufacturing systems based on an integration of tools. V. SINGH and R. H. WESTON 1

A generic model of manufacturing flexibility based on system control hierarchies. D. J. TINCKNELL and D. F. RADCLIFFE 19

Short term scheduling and control in the batch process industry using hybrid knowledge based simulation. W. R. GOODALL and R. ROY 33

Simultaneously determining the number of kanbans, container sizes, and the final-assembly sequence of products in a just-in-time shop. P. R. PHILIPOOM, L. P. REES and B. W. TAYLOR III 51

Robotic assembly system design for total productivity. H. K. RAMPERSAD 71

AGV dispatching. C. M. KLEIN and J. KIM 95

Machined surface error analysis for 5-axis machining. Y.-S. LEE and T.-C. CHANG 111

An investigation of alternative dampening procedures to cope with MRP system nervousness. C.-J. HO and P. L. CARTER 137

Characterization of shearing features for sheet metal components in 2-D layout. R. JAGIRDAR, V. K. JAIN, J. L. BATRA and S. G. DHANDE ... 157

Application of simulation and Petri net modelling in manufacturing control systems. H. SEIFODDINI and J. ZHANG 191

Machine scheduling models in environmentally focused chemical manufacturing. C. J. MALMBORG 209

A CAD/CAPP interface for complex rotationally symmetric parts. M. Y. JUNG and K. H. LEE 227

Performance analysis of modular products. D. W. HE and A. KUSIAK ... 253

A model for the optimal timing and sizing of capacity increments for single-location facilities. S. SIHA and C. DAS 273

Condition monitoring strategy—a risk based interval selection. A. S. R. MURTY and V. N. A. NAIKAN 285

Book Reviews 297

No. 2 February 1996

Framework of a fuzzy quality function deployment system. L. P. KHOO and N. C. HO ... 299

A column generation procedure for gang-rip saw arbor design and scheduling. Y. FATHI, S. R. KEGLER and C. T. CULBRETH ... 313

An extended dispatching rule approach in an on-line scheduling framework for batch process management. N. ISHII and M. MURAKI ... 329

Designing cellular manufacturing systems by a truncated tree search. C.-H. CHENG, M. S. MADAN and J. MOTWANI ... 349

Storage assignment policy tradeoffs. C. J. MALMBORG ... 363

An examination of flexibility measurements and performance of flexible manufacturing systems. I. J. CHEN and C.-H. CHUNG ... 379

Optimization of process improvement and inspection location for serial manufacturing. N. C. DELIMAN and R. M. FELDMAN ... 395

Location of departmental pickup and delivery points for an AGV system. J. KIM and C. M. KLEIN ... 407

Incorporating maintenance activities into production planning; integration at the master schedule versus material requirements level. T. D. RISHEL and D. P. CHRISTY ... 421

A genetic algorithm-based approach to cell composition and layout design problems. Y. GUPTA, M. GUPTA, A. KUMAR and C. SUNDARAM ... 447

Modelling the load levelling problem in master production scheduling for MRP systems. B. ADENSO-DÍAZ and M. LAGUNA ... 483

Determination of a disassembly strategy. K. D. PENEV and A. J. DE RON ... 495

Compensating probe radius in free surface modelling with CMM: simulation and experiment. S.-H. SUH, S.-K. LEE and J.-J. LEE ... 507

Scheduling multi-purpose batch plants with junction constraints. Y. M. DESSOUKY, C. A. ROBERTS, M. M. DESSOUKY and G. WILSON ... 525

Monitoring and evaluation of process parameters in a plunge grinding operation. C. B. ZHU, P. S. MIDHA and G. J. TRMAL ... 543

A hybrid intelligent system for fault diagnosis of advanced manufacturing system. N. YE and B. ZHAO ... 555

Scheduling of automated guided vehicles in a decision making hierarchy. M. S. AKTURK and H. YILMAZ ... 577

Book reviews ... 593

No. 3 March 1996

A Petri net approach to investigating push and pull paradigms in flexible factory automated systems. K. VENKATESH, M.-C. ZHOU, M. KAIGHOBADI and R. CAUDILL ... 595

Grouping PCBs for set-up reduction: a maximum spanning tree approach. G. BHASKAR and T. T. NARENDRAN ... 621

A methodology for analysing large-scale concurrent engineering systems. Y. KIM and P. J. O'GRADY 633
The classification of FMS scheduling problems. J. LIU and B. L. MACCARTHY 647
A comparison of heuristics for the problem of batching orders for warehouse selection. M. B. ROSENWEIN 657
An intelligent fuzzy set-up planner for manufacturability and fixturability evaluations. S. K. ONG and A. Y. C. NEE 665
A fast machine vision approach for automatic recognition of industrial parts. D.-M. TSAI and M.-F. CHEN 687
Logistics support for JIT implementation. M. S. SPENCER, P. J. DAUGHERTY and D. S. ROGERS 701
An optimal control model for continuous time production and setup scheduling. K. KOGAN and E. KHMELNITSKY 715
Component grouping for cell formation using resource elements. N. N. Z. GINDY, T. M. RATCHEV and K. CASE 727
Automated tactical maintenance planning based on machine monitoring. G. M. KNAPP and H.-P. WANG 753
Design of a tool management system in a flexible cell. R. MACCHIAROLI and S. RIEMMA 767
Sequential design with applications to the trim-loss problem. S. J. YAKOWITZ and R. D. DIETRICH 785
A branch-and-bound approach for machine selection in just-in-time manufacturing systems. R. A. GUTIÉRREZ and N. V. SAHINIDIS 797
The effect of combining simple priority heuristics in flow-dominant shops. F. MAHMOODI, C. T. MOSIER and R. E. GUERIN 819
Driving concurrency in a distributed concurrent engineering project team: a specification for an Engineering Moderator. J. A. HARDING and K. POPPLEWELL 841
The future role of DNC in metalworking SMEs. K. T. K. TOH and S. T. NEWMAN 863
Assembly problem identification by using cluster analysis. F. TADAYON ... 879
Technical note: The stochastic flowshop makespan: some further results. D. MIDDLETON 889
Announcement 895

No. 4 April 1996

A practical method for design of hybrid-type production facilities. G. HARHALAKIS, T. LU, I. MINIS and R. NAGI 897
FACT: A new neural network-based clustering algorithm for group technology. S. KAMAL and L. I. BURKE 919
An investment decision process: the case of advanced manufacturing technologies in Canadian manufacturing firms. V. KUMAR, S. A. MURPHY and S. C. K. LOO 947

An evaluation of group scheduling heuristics in a flow-line manufacturing cell. G. V. Frazier ... 959
Automatic cutter selection for 5-axis sculptured surface machining. Y.-S. Lee and T.-C. Chang ... 977
Analysis of partial setup strategies for solving the operational planning problem in parallel machine electronic assembly systems. B. A. Peters and G. S. Subramanian ... 999
Nonlinear control charts for jump detection. T. Sastri, J. B. Valdés and B. Flores ... 1023
The minimum-cost, machine-part cell formation problem. F. F. Boctor ... 1045
Specifications in stochastic process algebra for a robot control problem. S. Gilmore, J. Hillston, R. Holton and M. Rettelbach ... 1065
Scheduling using drum-buffer-rope in a remanufacturing environment. V. D. R. Guide, Jr. ... 1081
A Window approach for tolerance charting. B. K. A. Ngoi and M. S. Seow 1093
Implementation of an activity-based costing system in a small manufacturing company. A. Bharara and C.-Y. Lee ... 1109
Efficient operation of a surface mounting machine with a multihead turret. Jinhyeon Sohn and Sungsoo Park ... 1131
An integrated materials handling model for machine location in existing facilities. C. J. Malmborg ... 1145
Associativity modelling of a mould assembly for expandable polystyrene foam. S.-W. Lye and H.-Y. Yeong ... 1161
Technical note: Tabu search heuristic for a loading problem in flexible manufacturing systems. C. Basnet ... 1171
Book reviews ... 1175
Announcement ... 1177

No. 5 May 1996

A new grouping measure for evaluation of machine-component matrices. H. Seifoddini and M. Djassemi ... 1179
Modelling, measurement and evaluation of sequencing flexibility in manufacturing systems. S. Benjaafar and R. Ramakrishnan ... 1195
Integration of design and inspection systems – a literature review. D. I. Legge 1221
Theory and practice of manufacturing strategy. T. C. E. Cheng and H. Musaphir ... 1243
Analysis of model building techniques for the development of machinability database systems. I. A. Choudhury and M. A. El-Baradie ... 1261
Predictive models for performance evaluation of serial production lines. C.-M. Liu, S.-F. Su and C.-L. Lin ... 1279

Determination of optimum unit load size of the AGV in an electronics assembly production system. H. Hwang, S. Y. Kim and S. W. Moon ... 1293

Feature-based design of electronics assemblies. P. J. O'Grady, C. Kim and Y. Kim 1307

Strategic investment analysis using activity based costing concepts and analytical hierarchy process techniques. D. I. Angelis and C.-Y. Lee ... 1331

Part-mix allocation in a hybrid manufacturing system with a flexible manufacturing cell and a conventional jobshop. Dong-Ho Lee and Yeong-Dae Kim 1347

Cell formation considering alternate routeings. G. K. Adil, D. Rajamani and D. Strong 1361

A formalism for modelling intelligent control of material handling equipment in a distribution centre. S. Basu, V. M. Huynh and S. P. Dutta ... 1381

A computational study of heuristics for two-stage flexible flowshops. A. Guinet, M. M. Solomon, P. K. Kedia and A. Dussauchoy 1399

An experimental analysis of a Nd:YAG laser cutting process for machining silicon nitride. C. Durand, M. Ramulu, R. St. Pierre and J. Machan 1417

Comparing manufacturing output and practices in China, Hungary, the USSR and USA. V. A. Vargas, D. C. Whybark and C.-Z. Xiao ... 1429

Cell formation with operation times of jobs for even distribution of workloads. B. R. Sarker and C. V. Balan 1447

Book reviews 1469

Addendum 1471

Announcements 1472

No. 6 June 1996

An exploratory study of contingency variables that affect the conversion to cellular manufacturing systems. M. J. Choi 1475

An interview based study of two United Kingdom and two Japanese suppliers to Toyota. V. Gilgeous and Y. Yamada 1497

Disaggregation to a rolling horizon master production schedule with minimum batch-size production restrictions. R. Venkataraman and S. B. Smith 1517

Dynamic assignation of due-dates in an assembly shop based in simulation. D. B. Roman and A. G. del Valle 1539

A new method for workshop real time scheduling. J. -C. Billaut and F. Roubellat 1555

The impact of demands' correlation on the effectiveness of component commonality. A. Eynan 1581

Rough machining of free-form surfaces defined by dual kriging. F. Trochu, Y. Abong, M. Balazinski and P. Larbrisseau 1603

A real-time dynamic lot-sizing heuristic for a manufacturing system subject to random setup times. M. H. Burman and S. B. Gershwin 1625

Scheduling hybrid flowshops to minimize maximum tardiness or maximum completion time. A. G. P. Guinet and M. M. Solomon 1643

Dynamic relative positioning of AGVs in a loop layout to minimize mean system response time. Suk-hwa Chang and P. J. Egbelu 1655

A new simulated annealing algorithm for the facility layout problem. R. D. Meller and Y. A. Bozer 1675

Models for machine-part grouping in cellular manufacturing. Y. Crama and M. Oosten 1693

Multivariate statistical process control for autocorrelated processes. G. C. Runger 1715

The effect of labour costs, holding costs, and uncertainty in demand on pull inventory control policies. G. W. Clendenen and D. B. Rinks 1725

Indentifying attributes for knowledge-based development in dynamic scheduling environments. C. C. Chen and Y. Yih 1739

Closed form models for determining the optimal dwell point location in automated storage and retrieval systems. B. A. Peters, J. S. Smith and T. S. Hale 1757

Book reviews 1773

No. 7 July 1996

Neural computing-based design of components for cellular manufacturing. A. Kusiak and H. Lee 1777

Machine understanding of manufacturing features. V. Allada and S. Anand 1791

Finding part-machine families using graph partitioning techniques. S. W. Hadley 1821

Operational dimensioning and tolerancing in process planning: setup planning. H.-C. Zhang, S. H. Huang and J. Mei 1841

Evaluating capacity change and setup time reduction in a capacity-constrained, joint lot sizing situation. E. A. Duplaga, C. K. Hahn and C. A. Watts 1859

A systemic framework for the recovery of flexible production systems. E. D. Adamides, E. C. Yamalidou and D. Bonvin 1875

Shaded image machining: a reverse engineering approach using computer vision techniques and analytical methods to reproduce sculptured surfaces. W. L. R. Ip and M. Loftus 1895

Design of cellular manufacturing systems. D. Rajamani, N. Singh and Y. P. Aneja 1917

Optimal policies for aggregate production and capacity planning under rapidly changing demand conditions. E. Khmelnitsky and K. Kogan ... 1929

An empirical assessment of the influence of quality dimensions on organizational performance. C. N. MADU, C.-H. KUEI and R. A. JACOB 1943

A cost model for justifying the acceptance of rush orders. M. C. WU and S. Y. CHEN 1963

Representation of feature relationship tolerances in solid models. V. S. KULKARNI and S. S. PANDE 1975

Priority-based tool allocation in a flexible manufacturing system. S. K. MUKHOPADHYAY and S. K. SAKU 1995

Scheduling larger job shops: a decomposition approach. D. SUN and R. BATTA 2019

Impact of inspection errors on performance measures of a complete repeat inspection plan. S. O. DUFFUAA 2035

Determination of the optimal production run and the most profitable process mean for a production process. S.-L. CHEN and K.-J. CHUNG 2051

Production and maintenance integrated planning. M. BRANDOLESE, M. FRANCI and A. POZZETTI 2059

No. 8 August 1996

Scheduling research in multiple resource constrained job shops: a review and critique. V. B. GARGEYA and R. H. DEANE 2077

A framework for the dual command cycle travel time model in automated warehousing systems. C.-H. PAN and C.-H. WANG 2099

The house of quality in a design process. U. BELHE and A. KUSIAK 2119

A framework for hierarchical interactive generation of cellular layout. C. TANG and L. L. ABDEL-MALEK 2133

Heuristic scheduling of jobs on a multi-product batch processing machine. M. P. FANTI, B. MAIONE, G. PISCITELLI and B. TURCHIANO 2163

Optimal tolerance design for product life cycle. A. JEANG 2187

Heuristic rules and strategies of assembly planning: experiment and implications in the design of assembly decision support system. N. YE and D. A.URZI 2211

Formation and dynamic routeing of part families among flexible manufacturing cells. H. J. WEN, C. H. SMITH and E. D. MINOR 2229

An integrated methodology for automating the determination of layout and materials handling system. P. S. WELGAMA and P. R. GIBSON 2247

A neural fuzzy control chart for detecting and classifying process mean shifts. S. I. CHANG and C. A. AW 2265

Competitive methods for multi-level lot sizing and scheduling: tabu search and randomized regrets. A. KIMMS 2279

Part-machine grouping using a multi-objective cluster analysis. M. S. AKTURK and H. O. BALKOSE 2299

Computer aided planning and design of manual assembly systems. W. J. Braun, R. Rebollar and E. F. Schiller 2317
Resource-constrained project scheduling by simulated annealing. F. F. Boctor 2335
An intelligent controller for manufacturing cells. Y.-L. Sun and Y. Yih ... 2353
Book reviews 2375
Erratum 2377
Announcement 2378

No. 9 September 1996

The process of ISO 9000 series registration: an examination in small companies. M. M. McTeer and B. G. Dale 2379
Flow control of two-level assembly lines. A. Haouba and X. Xie 2393
Formulation and solution of the drum-buffer-rope constraint scheduling problem (DBRCSP). J. V. Simons, Jr., W. P. Simpson, III, B. J. Carlson, S. W. James, C. A. Lettiere and B. A. Mediate, Jr. 2405
Manufacturing investment–performance causality in the UK clothing industry. D. J. Hamblin and A. Lettman 2421
An inspection policy for a deteriorating single-unit system characterized by a delay-time model. S. Okumura, A. K. S. Jardine and H. Yamashina ... 2441
Simple CADCAM procedures for complex shaped components. A. A. Ball 2461
Identifying the composition of a cellular manufacturing system. F. Amirahmadi and F. Choobineh 2471
A decoding algorithm for unique correspondence in range data acquisition. P. M. Griffin and S. R. Yee 2489
On-line tool adjustment with adaptive tool wear function identification. D. X. Wang, M. J. Zuo, K. Z. Qi and M. Liang 2499
Measuring manufacturing competence: a fuzzy approach. G. Azzone and A. Rangone 2517
A knowledge-based system for solving multi-objective assembly line balancing problems. B. Malakooti and A. Kumar 2533
A three-stage simulation based approach to inventory management with discrete demand. Q. Cao, J. W. Patterson and J. Melkonian 2553
An improved tabu search heuristic for solving facility layout design problems. W.-C. Chiang and P. Kouvelis 2565
A polynomial-time algorithm for optimal clustering in a special class of {0,1}-matrices. D. Veeramani and K. Mani 2587
Heuristic family disaggregation techniques for hierarchical production planning systems. L. Özdamar, A. Ö. Atli and M. A. Bozyel 2613
Mechanism of material removal in the magnetic abrasive process and the accuracy of machining. G. Z. Kremen, E. A. Elsayed and V. I. Rafalovich 2629

Process plan selection based on product mix and production volume. Y. Seo and P. J. Egbelu 2639
The impact of restricting the flow of inventory in serial production systems. J. B. Atwater and S. S. Chakravorty 2657
Announcements 2671

No. 10 October 1996

A comparative study of the operations strategies of globally- and domestically-oriented New Zealand manufacturing firms. L. M. Corbett 2677
A new approach for solving the P-median problem in group technology. S. Viswanathan 2691
Recognition and interpretation of interacting and non-interacting features using spatial decomposition and Hamiltonian path search. A. Trabelsi and S. Meeran 2701
Facility layout objective functions and robust layouts. R. D. Meller and K.-Y. Gau 2727
Analysis of jig flow in high precision automatic adhesive manufacturing systems. T. Iyama, M. Mizuno and J. Tamaki 2743
A design of experiment approach to the selection of CMM form-fitting algorithms. P. Varghese, C. Zhang and H.-P. Wang 2755
Grouping index: a new quantitative criterion for goodness of block-diagonal forms in group technology. G. J. K. Nair and T. T. Narendran ... 2767
Information and scheduling in a dual resource constrained job shop. L. D. Fredendall, S. A. Melnyk and G. Ragatz 2783
A simulated annealing approach for optimization of multi-pass turning operations. M.-C. Chen and D.-M. Tsai 2803
Impact of empty vehicle flow on optimal flow path design for unidirectional AGV systems. X.-C. Sun and N. Tchernev 2827
Hotelling's T^2 control chart with adaptive sample sizes. F. Aparisi ... 2853
Aircraft maintenance and inventory control using the reorder point system. A. A. Ghobbar and C. H. Friend 2863
Effects of kanban withdrawal policies and other factors on the performance of JIT systems—a simulation study. M. Savsar 2879
Solving cell formation problems in a manufacturing environment with flexible processing and routeing capabilities. Y.-C. Ho and C. L. Moodie ... 2901
On the robustness of using balanced part mix ratios to determine cyclic part input sequences into flexible flow systems. T. M. Smith and K. E. Stecke 2925
Retrieval sequencing for unit-load automated storage and retrieval systems with multiple openings. H. F. Lee and S. K. Schaefer 2943
On the worse case performance of TESSA. K. H. Watson and J. W. Giffin 2963

Discussion: A note on 'Dealing with a shelf life constraint in cyclic scheduling by adjusting both cycle time and production rate'. S. K. GOYAL 2967
Comment on: Goyal's note. E. A. SILVER 2971
Book reviews 2973
Announcements 2977

No. 11 November 1996

On Green Area implementation problems: a case study. S. G. DESMUKH, N. D. BURNS and C. J. BACKHOUSE 2981
Controlling multiple stream processes with principal components. G. C. RUNGER, F. B. ALT and D. C. MONTGOMERY 2991
Petri net models of flexible and automated manufacturing systems: a survey. K. E. MOORE and S. M. GUPTA 3001
The impact of lot sizing and sequencing on manufacturing performance in a two-stage hybrid flow shop. H. TSUBONE, M. OHBA and T. UETAKE ... 3037
Measuring the environmental performance of new products: an integrated approach. G. AZZONE and G. NOCI 3055
Fit capability indices and their applications. Z. ZHANG and X. D. FANG ... 3079
Product grouping for batch processes. P. C. JONES and R. R. INMAN ... 3095
A simulation analysis for two-level sequence-scheduling for just-in-time (JIT) mixed-model assembly lines. H. AIGBEDO and Y. MONDEN 3107
Evaluating sequences for paced, mixed-model assembly lines with JIT component fabrication. R. T. SUMICHRAST and E. R. CLAYTON 3125
An interactive decision framework for multiple objective production planning. H. S. LEWIS, J. R. SWEIGART and R. E. MARKLAND 3145
A heuristic for formulating within-plant manufacturing focus. C. SHEU and L. J. KRAJEWSKI 3165
Detecting and locating burrs of industrial parts. D.-M. TSAI and W.-J. LU 3187
Application of fuzzy decision-making in facilities layout planning. F. DWEIRI and F. A. MEIER 3207
Analysis of the behaviour of production systems using continuous simulation. D. THIEL 3227
Analysis of production control systems kanban and CONWIP. S. GSTETTNER and H. KUHN 3253
Interactive quality improvement of a process subject to complete inspection. W. C. NG and Y. V. HUI 3275
A concern regarding the revised product-process matrix. E. A. SILVER ... 3285
Announcement 3289

No. 12 December 1996

Neuro-fuzzy control of complex manufacturing processes. Y. C. SHIN and P. VISHNUPAD 3291

A production and maintenance planning model for the process industry. J. ASHAYERI, A. TEELEN and W. SELEN 3311

Incorporating the impact of learning in assessing the effectiveness of cellular manufacturing. V. R. KANNAN 3327

Possibilistic multi-response quality design. Y.-J. LAI 3341

Simultaneous tolerancing for design and manufacturing. G. ZHANG ... 3361

Load selection of automated guided vehicles in flexible manufacturing systems. J. LEE, M. TANGJARUKIJ and Z. ZHU 3383

The threshold value of a quality index for formation of cellular manufacturing systems. H. SEIFODDINI and M. DJASSEMI 3401

A simulation study of container size in two-card kanban systems. B. J. BERKLEY 3417

Sequencing of robot activities and parts in two-machine robotic cells. R. LOGENDRAN and C. SRISKANDARAJAH 3447

Formulations and heuristics for scheduling in a buffer-constrained flowshop and flowline-based manufacturing cell with different buffer-space requirements for jobs: Part 1. B. SHARADAPRIYADARSHINI and C. RAJENDRAN ... 3465

An index system for modular fixture design: applied to case-based reasoning. S. H. SUN and J. L. CHEN 3487

Robustness of order reliability models with applications to order ageing. M. E. JOHNSON, T. DAVIS and H. L. LEE 3499
